

Patient Care Highlight * * * *

General pediatrics floor renovations

A nine-bed Intermediate Care Unit (IMCU) opened on the general pediatrics floor at Shands Children's Hospital at UF on Sept. 18. Included in the room design, are three private and three semi-private rooms, upgraded bathrooms and a nursing desk alcove overseeing patient care between the rooms. Children's Miracle Network funded this \$450,000 project. Now that the IMCU is completed, the remaining 14 patient rooms on the general pediatrics floor will receive an upgrade. In order to complete the construction project while patients were housed on the pediatric wing, a temporary wall was installed. Healthcare providers were painted on the wall by Shands Arts In Medicine artists. This beautiful mural is in appreciation of all the dedicated team members taking care of children at Shands Children's Hospital.
